Letter of Recommendation

To whom it may concern,

Carpathian Foundation – Fund for the Development of the Carpathian Euroregion Romania (FDEC Romania) is a financing organism, which offers technical and financial support to the nongovernmental organizations and the local public administrations from the area of the Carpathian Euroregion respectively the counties Bihor, Botoșani, Harghita, Maramureș, Satu Mare, Sălaj and Suceava.

In its financing lines FDEC Romania has approved and sustained 4 projects implemented by Hygeia Foundation - CREST Resource Center, starting with 1998. These projects fitted in the criteria of the Foundation and succeeded in achieving our objectives regarding community development and the involvement in this field of local actors: governmental, nongovernmental and those from the business sector.

The activity of Hygeia Foundation – CREST Resource Center, contributes significantly at the institutional capacity development of the civil organizations from the North-Western Region as well as at the development of the rural area communities through the promotion and implementation in Romania of the TeleCottage concept. The way of approach of this concept and especially the involvement of the communities in the programmes and the decisions that they make is remarkable.

Their remarkable results so far, determine us to sustain them in the development and the extension of their programs and to recommend them for strategic partnership building with other organisations with similar profiles or with complementary objectives from the country and abroad.

Lorena STOICA
Country Director for Romania
